8 Privacy Types and 1 Aspect
(II) the privacy of personal behaviour
(I) the privacy of the physical person

The data collection process of a DPIA consider the impact of a demand backed by legal authority on a person’s data. Does it make any difference if the material is collected as a result of a request rather than as a demand?

Can a DPIA consider the physical aspects of capturing bio-samples?

Reasons why a DPIA isn’t a PIA

Questions re Collection of Body Tissue and Body Fluids

Can a DPIA consider the physical aspects of acquiring bio-samples?

Does it make any difference if the material is collected as a result of a ‘request’ rather than a ‘demand’ backed by legal authority?

Can a DPIA consider the impact of the data collection process on:

(i) the privacy of the physical person?
(ii) the operation of cameras?

If no data is recorded, can a DPIA consider the impact on the privacy of personal behaviour of the mere presence of cameras can concern people.

Data can be streamed elsewhere without recording it.

Can a DPIA consider the impact on the privacy of:

(i) the operation of cameras?
(ii) the existence of cameras, even in non-operational?

Questions re Visual Surveillance CCTV, ANPR, body-worn cameras, drone-borne cameras
